Report to Investors
For Year 2026

(October 1, 2025 – September 30, 2026)

Review of 2026

- The revenue from sales in 2026 was 2,468.99 million Baht, decreased from the same period of last year 48.42 million Baht or 1.92%. Such are the results of economic growth, which is still behind expectations and leads to a smaller index of industrial output. The fact that the weak spending power of workforce and the high volume of household debt really affect the automotive loan approval from financial institutions.

Overview

- Total comprehensive income of 2026 was 320.75 million Baht, an increase of 25.84 million Baht or 7.46% from 2025. The performance derived from the efficiency in production cost management, causing raw material prices to decrease, and the Company managed expenses effectively.
- According to the Federation of Thai Industries (FTI), Thailand's automotive industry showed a gradual recovery during the first nine months of 2026. Cumulative vehicle production reached 1,080,030 units, representing a 0.39% increase compared with the same period of the previous year. Meanwhile, cumulative domestic vehicle sales totaled 521,226 units, an increase of 16.35% year-on-year. However, cumulative vehicle production for export amounted to 686,647 units, a 3.41% decline from the previous year, reflecting pressures from the global economic environment and intense competition in export markets
- The transition toward electric vehicles (EVs) remained evident, with battery electric vehicle (BEV) sales reaching 16,404 units, up 80.13% year-on-year, while internal combustion engine (ICE) vehicle sales declined 14.50% to 7,776 units. In addition, flooding in certain areas disrupted parts manufacturers and logistics operations, causing some vehicle assembly plants to temporarily suspend production. This situation highlights ongoing risks to supply chain continuity within the automotive industry.

  TSC will closely monitor the situation and adjust the business plans to catch up to upcoming situations.
