

# New Era for Pathology Software

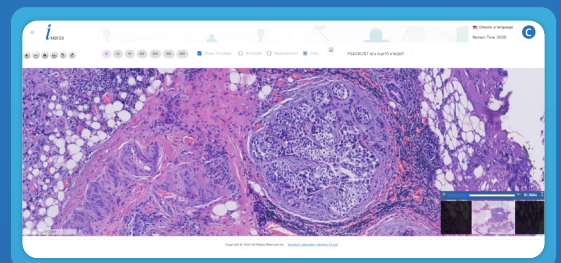

Software that integrates innovative information technology to manage pathology laboratory processes, enhancing convenience, reducing errors, and improving operational efficiency.

## IMPROVEMENT

This system is developed by Thai professionals, ensuring ease of use in the local language.

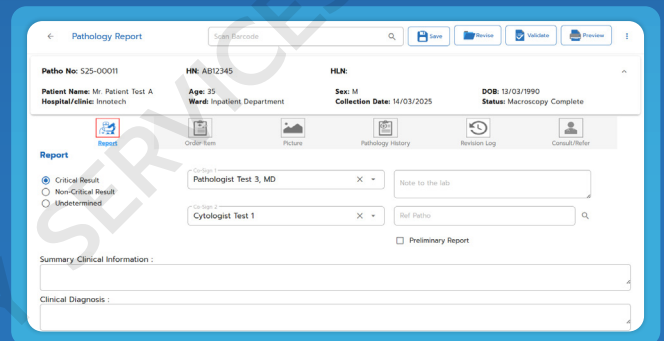

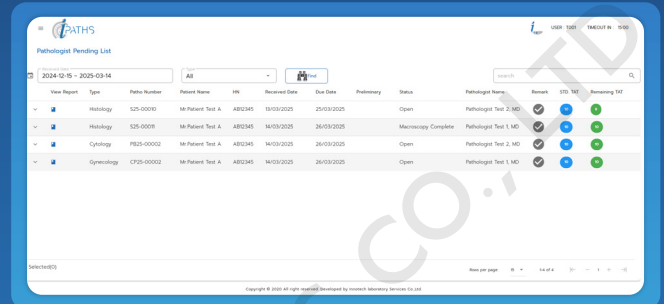

- Real-Time Monitoring: Track progress, check work status, and quickly search for information.
- Digital Pathology: Pathologists can view microscopic images via a web-based system anytime, anywhere.
- Diagnosis & Reporting: Access pathology diagnoses and statistical reports through a website or smartphone.
- Dashboard & Visualization: Display data in an intuitive and visual format for better insights.

## HIGHLY FLEXIBLE

Our system ensures quick and reliable status checks, tracking, and notifications, with customizable features tailored to user needs. This flexibility enhances operational efficiency to the highest level.

- Block & Slide Management System – Secure storage, verification, and tracking of blocks and slides to prevent loss and facilitate easy retrieval.
- Special Staining Order Alerts – Receive notifications for special staining requests.
- Out Lab Management System – Efficiently manage external lab testing processes.
- Smart Notifications – Real-time alerts on smart phones and smartwatches, compatible with both iOS and Android.

## ADDITIONAL FEATURES

- Block & Slide Quality Assessment System
- Pathologist Work Schedule Management System
- Internal Messaging System for seamless communication within the organization

## ENHANCEMENTS

- Quality assessment system for blocks and slides
- Work scheduling system for pathologists
- Internal messaging system for intra-departmental communication

## A TOTAL SOLUTION

Certified with BSI ISO/IEC 27001:2013  
(Information Security Management System)

- Ensures data security and confidentiality, giving users peace of mind.
- Designed to align with international standards for pathology laboratory operations.
