New Era for Pathology Software

Software that integrates innovative information technology to manage pathology laboratory processes, enhancing convenience, reducing errors, and improving operational efficiency.

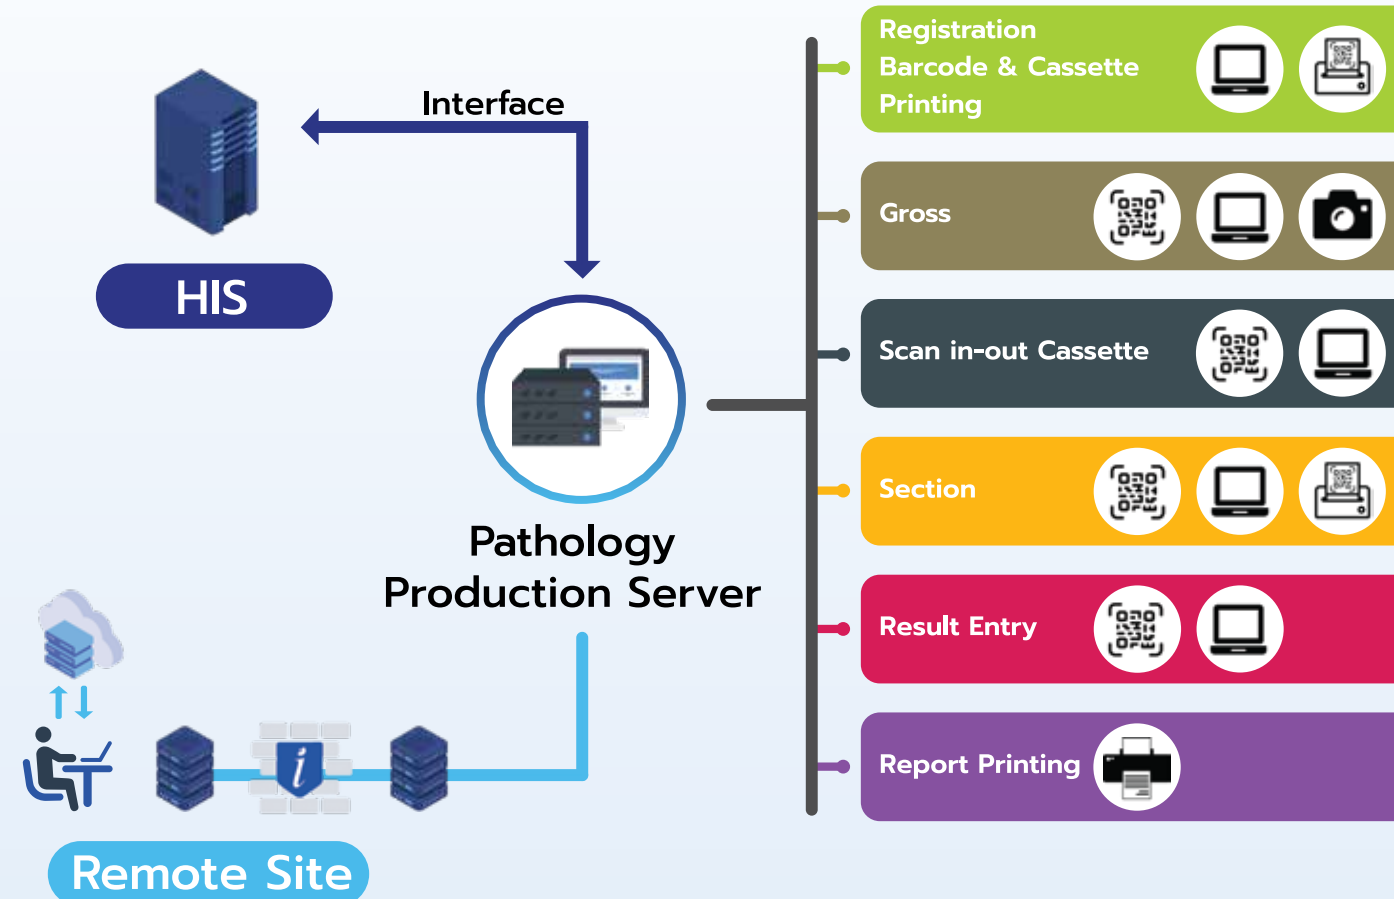

HIGHLIGHTS

The system is developed by healthcare professionals, ensuring operational efficiency

- Real-Time Monitoring: Track progress, review status, and find information instantly
- Digital Pathology: View microscopic images from our propriety web-based system anytime, anywhere
- Diagnosis & Reporting: View pathology results and reports anytime on web or smart devices
- Dashboard & Visualization: Visualize data intuitively for deeper insights

Network Overview

Highly Flexible

Experience fast, reliable tracking and notifications with customizable features that adapt to your needs — delivering peak operational efficiency

- Block & Slide Management System - Ensure secure storage, verification, and tracking of blocks and slides, preventing loss and enabling effortless retrieval
- Special Staining Order Alerts - Get instant notifications for all special staining requests
- Out-lab Management System - Efficiently manage external lab testing processes
- Smart Notifications - Real-time alerts on smart devices; compatible with both iOS and Android devices

A Total Solution

Certified with BSI ISO/IEC 27001:2013 (Information Security Management System)

- Ensures data security and confidentiality, giving users peace of mind
- Designed to align with international standards for pathology laboratory operations

Additional Features

- Block & Slide Quality Assessment System
- Pathologist Work Schedule Management System
- Internal Messaging System for seamless communication across the organization

Enhancements

- Quality assessment system for blocks and slides
- Work scheduling system for pathologists
- Internal messaging system for intra-departmental communication
