

New Era for Pathology Software

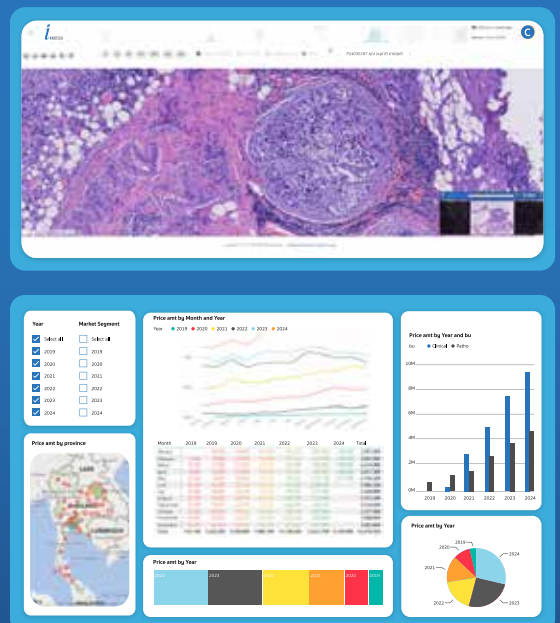

Software that streamlines pathology processes, using innovative IT to boost convenience, accuracy, and efficiency.

FEATURES:

This system is developed by professionals, ensuring ease of use in laboratory and relevant work setting.

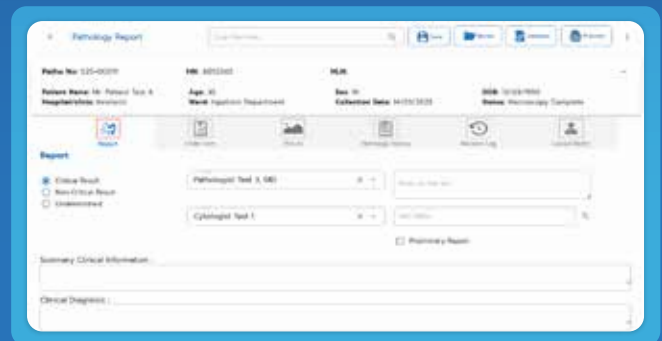

- Real-Time Monitoring: Monitor progress, track status, and final information instantly
- Digital Pathology: Pathologists can view microscopic images via a web-based system anytime, anywhere
- Diagnosis & Reporting: Access pathology diagnoses and statistical reports through web and mobile
- Better Insight: Intuitive and visually engaging table data display

HIGHLY FLEXIBLE

Experience fast, reliable tracking and notifications with customizable features that adapt to your needs - delivering peak operational efficiency

- Block & Slide Management System
 - Ensure secure storage, verification, and tracking of blocks and slides, preventing loss and enabling effortless retrieval
- Special Staining Order Alerts – Get instant notifications for all special staining requests
- Out-lab Management System - Effectively manage external lab testing processes
- Smart Notifications - Real-time alerts on smart devices; compatible with both iOS and Android devices

ADDITIONAL FEATURES

- Block & Slide Quality Assessment System
- Pathologist Work Schedule Management System
- Internal Messaging System for seamless communication across the organization

ENHANCEMENTS

- Quality assessment system for blocks and slides
- Work scheduling system for pathologists
- Internal messaging system for intra-departmental communication

A TOTAL SOLUTION

Certified with BSI ISO/IEC 27001:2013 (Information Security Management System)

- Ensures data security and confidentiality, giving users peace of mind
- Designed to align with international standards for pathology laboratory operations
