

Giant Elite

Tower Model

G-5000:	5000VA/4000W
G-6250:	6250VA/5000W
G-10K:	10kVA/8kW

Main Features

- True on-line double conversion with full bridge inverter technology
- DSP technology guarantees high performance
- Galvanic isolation transformer design to withstand all kinds of loads
- Unique ventilation design for effective heat dissipation
- Wide input voltage and frequency range to withstand robust environment
- Fully coating PCBAs to withstand harsh environment
- Advanced Battery management (ABM)
- Mimic LCD display and LED status
- High short-circuit and overload capabilities
- Overload, short circuit, surge and spike protection
- Expanded long backup time with external battery
- Built-in maintenance bypass switch
- Dry contact RS-232 and USB port for management software
- Generator compatible
