	Volume up for Mic.
	Mute or unmute for Mic.
	Volume down.
	Volume up.
	Mute or unmute for audio output.

Tips: The remote control is powered by 2 AAA batteries which are not included and need to be purchased independently.

1.4. Remote Diagram

2.1 DISPLAY

Please press  button on remote to display media information OSD.

- Display OSD

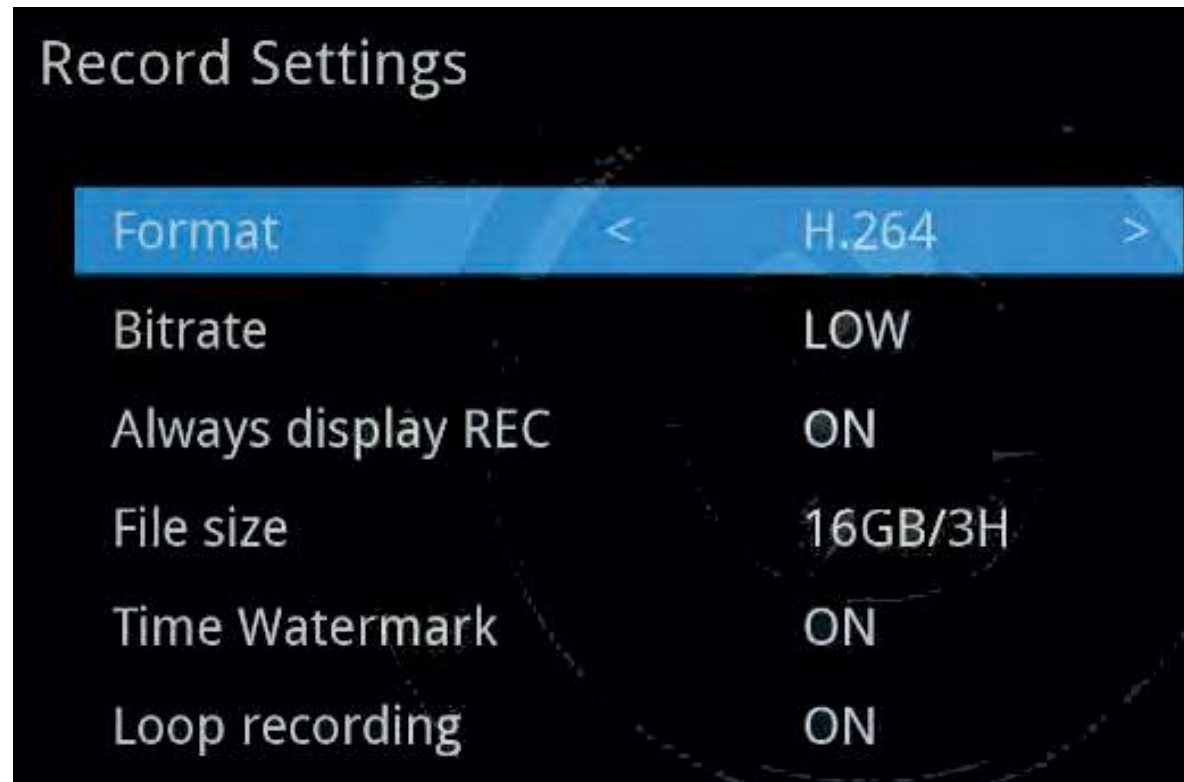

2.2 Settings Menu

Please press  button on remote to display settings menu.

- Show up the Settings Menu

1. Record settings

- **Format**

- H.264 (AVC)
- H.265 (HEVC)

- **Bitrate**

- **Bitrate set to Low**
 - * H.264: UHD 16Mbps, FHD 12Mbps, HD 8Mbps, SD 4Mbps
 - * H.265: UHD 12Mbps, FHD 8Mbps, HD 6Mbps, SD 4Mbps
- **Bitrate set to High**
 - * H.264: UHD 20Mbps, FHD 16Mbps, HD 12Mbps, SD 8Mbps

2.2. Settings Menu

* H.265: UHD 16Mbps, FHD 12Mbps, HD 8Mbps, SD 4Mbps

The bitrate can be set, the compression bitrate is related to the video compression format and resolution.

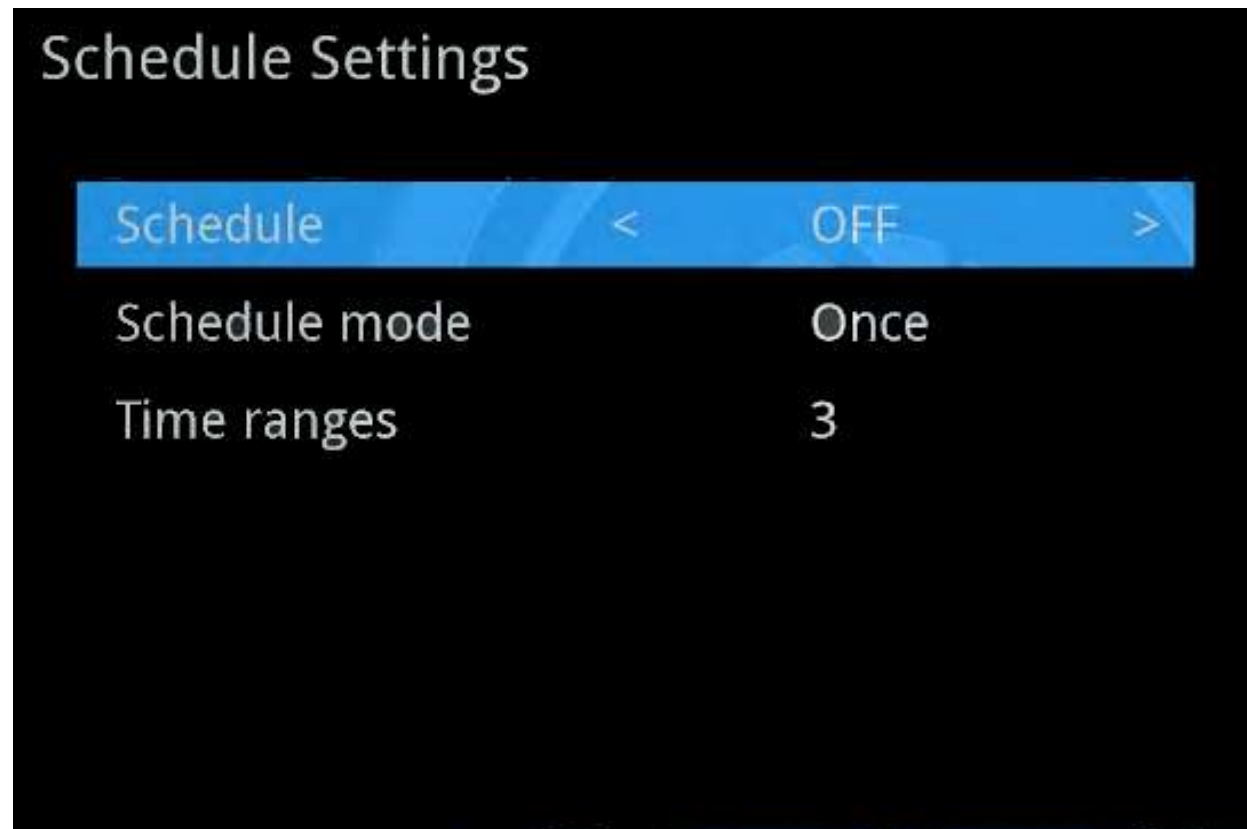

- **Always display REC**
 - ON: It will always display “REC” during recording.
 - OFF: “REC” only shows up at the beginning of recording, and will disappear in a few seconds
- **File size**
 - 16GB/3H: Single file max size up to 16GB or 3 hours
 - 2GB/3H: Single file max size up to 2GB or 3 hours
 - 4GB/3H: Single file max size up to 4GB or 3 hours

TIP: Using FAT32 USB storage devices, the single recorded file will be 4GB at most due to the limitation of FAT32 format.

- **Time Watermark**
 - ON: It will display time watermark during recording.
 - OFF: No time watermark displayed on screen.
- **Loop recording**
 - ON: Enable loop recording. Under this setting, when the USB storage device is full, it will keep recording and previous files will be overwritten.
 - OFF: Disable loop recording. Under this setting, when the USB storage device is full, it will stop recording automatically.

2.2. Settings Menu

2. Schedule settings

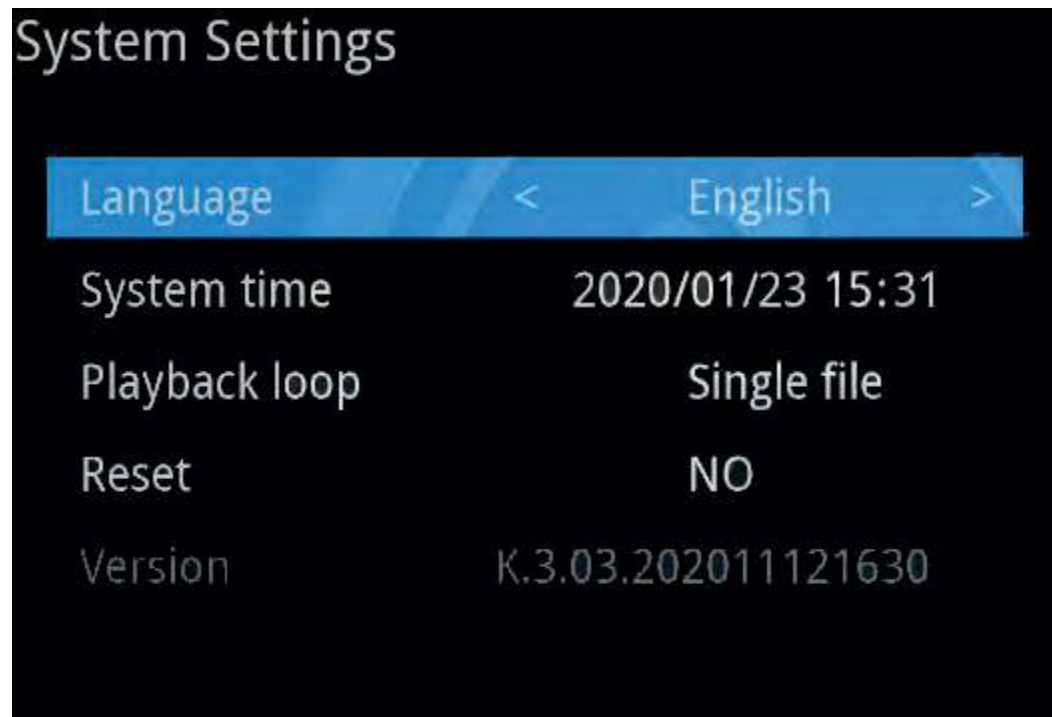

- **Schedule**
 - ON: Enable schedule recording.
 - OFF: Disable schedule recording.

2.2. Settings Menu

-
- **Schedule mode :**
 - Once
 - Every Day
 - **Time ranges** Max task number is up to 3

3. System settings

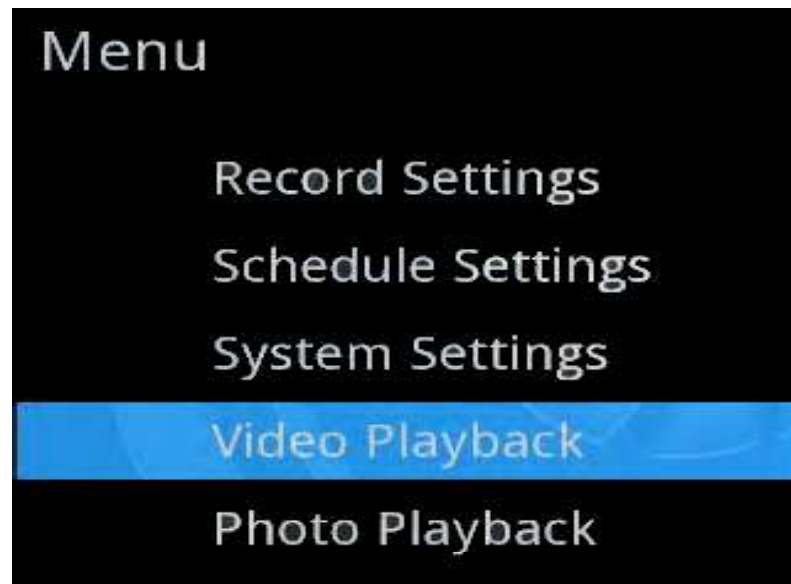

- **Language**
 - English
 - Simplified Chinese.
- **System time**
 - yyyy-mm-dd hh-mm
- **Playback loop**

2.2. Settings Menu

-
- Single file: Play a single file in a loop.
 - Full list: Play the whole file list in a loop.
 - OFF: Disable playback loop function.
 - **Reset** Restore Factory Default Settings.
 - **Version** Firmware version is only for developers' references.

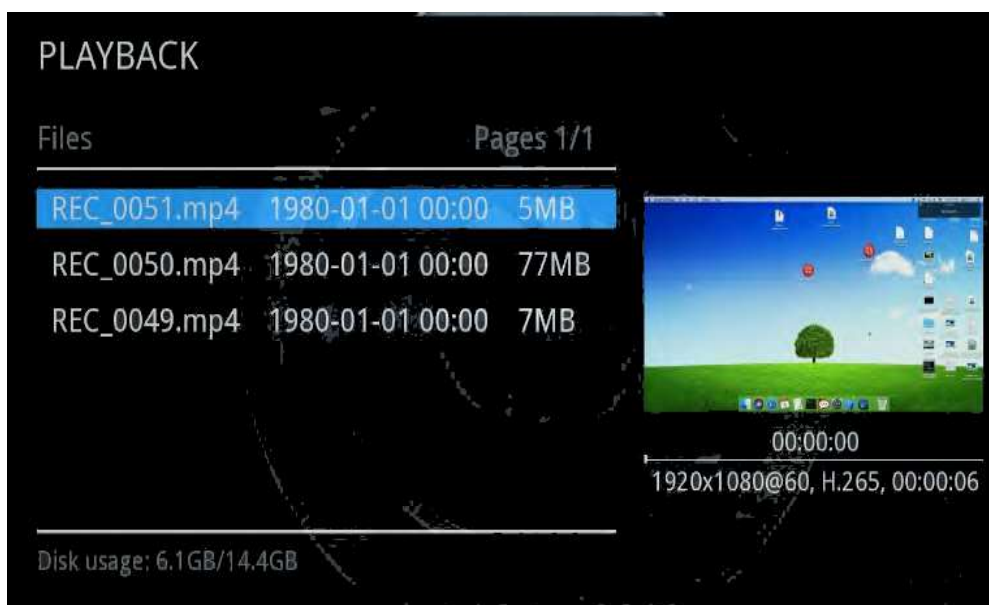

4. Video playback

After recording, make sure USB flash drive is connected to LVR1000. Press MENU button on remote and select “Video playback” or press VIDEO button on remote to enter “Video playback” interface directly.

2.2. Settings Menu

Choose the file you want to play back by using the four arrow buttons on the remote control, and press PLAYBACK button on remote to start/pause playback. You also can enter fullscreen by pressing OK button on the remote control.

5. Photo playback

LVR1000 supports photo playback, please press MENU button on remote and select “Photo playback” or press IMAGE button on remote to enter “Photo playback” interface directly.

2.2. Settings Menu

Select the photo you desired by using the four arrow buttons on the remote control. It will display fullscreen by pressing OK button.

RECORD VIDEOS TO THE USB STORAGE DEVICE

3.1 Connect

1. Connect the video player to IN port on LVR1000 via an HDMI cable.
2. Connect LVR1000 from OUT port to TV via an HDMI cable.
3. Plug the USB storage device into LVR1000.
4. Plug the power adapter into the power socket and plug the other end into the 5V/2A port of LVR1000.
5. Power on LVR1000 after all devices and cables are well connected.

Tips:

Please use a premium USB flash drive or mobile hard disk with high speed to avoid unexpected problems such as file loss.

3.2 Record videos

You can select to use the function buttons on LVR1000 to record or use the remote of LVR1000 to record. Please check out details below.

- Record videos with the buttons on the front panel of LVR1000
1. Power on all devices, the video image from the video player will be displayed on TV and the LED will illuminate solid blue or solid green. Solid blue indicates the output resolution is 4K30 and solid green indicates the output resolution is 1080p60 or below. If the top LED is blinking blue and green alternately, that indicates there is no input signal detected.
 2. Before recording, you can easily switch to H.264 or H.265 by pressing H.264/H.265 button on the front panel of LVR1000. This option should be done with USB storage device connected to LVR1000.
 3. Press the Rec/Stop button on LVR1000, then the LED will blink blue or green, which indicates LVR1000 is in the process of recording.

3.2. Record videos

4. Press the Rec/Stop button again on LVR1000, then the LED will blink blue/green alternately, which indicates the recorded video is being saved.
 5. When the LED turns solid blue or solid green from blinking blue/green alternately, it indicates the video has been saved successfully.
 6. You can playback the recorded files on LVR1000 directly or on PC or on a smart TV.
- Record videos with the remote included with LVR1000

3.2. Record videos

-
1. Power on all devices, the video image from the video player will be displayed on TV and the LED will illuminate solid blue or solid green. Solid blue indicates the output resolution is 4K30 and solid green indicates the output resolution is 1080p60 or below. If the top LED is blinking blue and green alternately, that indicates there is no input signal detected.
 2. Before recording, you can easily switch to H.264 or H.265 by pressing H.264/H.265 button on the front panel of LVR1000. This option should be done with USB storage device connected to LVR1000.

3. Press the Rec/Stop button on the Remote of LVR1000, then the LED will blink blue or green, which

3.2. Record videos

indicates the capture box is in the process of recording.

4. During recording process, you can adjust the volume of HDMI IN at any time. If you got Mic connected, you also can adjust the volume of Mic during recording by pressing the volume up/down button on the Remote.

3.2. Record videos

-
5. Press the Rec/Stop button again on the Remote, then the LED will blink blue/green alternately, which indicates the recorded video is being saved.
 6. When the LED turns solid blue or solid green from blinking blue/green alternately, it indicates the video has been saved successfully.
 7. You can playback the recorded files on LVR1000 directly or on PC or on a smart TV.

Note: DO NOT remove the USB storage drive from LVR1000 in the process of recording (Flashing Blue/Green LED indicates it's still in the process of recording.)

3.3 Take Snapshots

1. Using the Remote included with LVR1000 to take a snapshot.

Press  on the remote control to take a snapshot.

2. Using the buttons on the front panel of LVR1000

Press “Snapshot” button on the front panel of LVR1000 to take a snapshot.

You can playback the snapshots on LVR1000 directly or on PC or on smart TV.

3.3. Take Snapshots

3.4 Record live commentary or voice-over

LVR1000 can capture and mix dual audio channels coming from game console and your microphone. Capture your live commentary with the microphone jack, which is built into LVR1000. Plug a microphone and then capture your gameplay with your live voice!

- Connect MIC

3.4. Record live commentary or voice-over

It is compatible with most 3.5mm audio standard MICs, you can mix your voice into source video.

It will be shown in display OSD as “MIC ON”

3.4. Record live commentary or voice-over

- Connect Line in

Line in socket is compatible with 3.5mm audio connector, such as audio mix device, mp3 players and cell phones.

You can easily mix audio via “Line in” by using 3.5mm audio cable connected to audio devices.

3.4. Record live commentary or voice-over

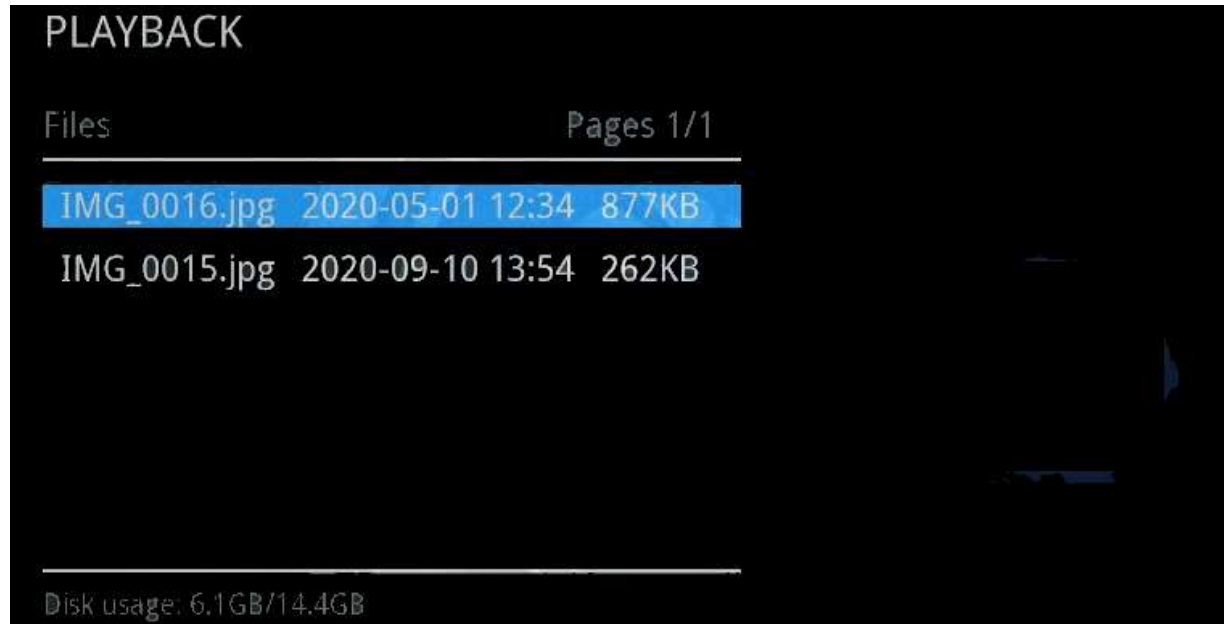

After connected audio device to “Line in” , it will directly mix audio to HDMI embedded audio. It also can be monitored from “Line out” and output devices.

- Adjust Mic volume using the Remote

You can press volume up/down button on the Remote control of LVR1000 to adjust the volume of Mic.

The up/down buttons on the Remote control: 

3.4. Record live commentary or voice-over

- Fullscreen playback
Select your desired file by using the four arrow buttons on the remote control. You can preview the files and press “OK” button to fullscreen playback.

4.1. Playback the Recorded media files on UHD Pro directly

- Quick solutions

If you got problems in the process of playback, Please try the steps below:

1. Please make sure that your USB stick/external hard drive works well. You can change another one to confirm it or format it to resolve it.
2. Please adjust resolution to test again.
3. If the methods don't work, refer to the link above to format your USB stick/external hard drive to fix it.

4.2 Playback the Recorded media files on TV

- Connect

1. Plug the USB flash drive to the USB socket of a smart TV which has built-in media file playback function.
2. Power on the smart TV

- Steps

1. After files are successfully saved to USB flash drive, plug the USB flash drive to the USB socket of a smart TV which has built-in media file playback function.

4.2. Playback the Recorded media files on TV

2. Launch USB device on smart TV, then playback the files LVR1000 recorded.

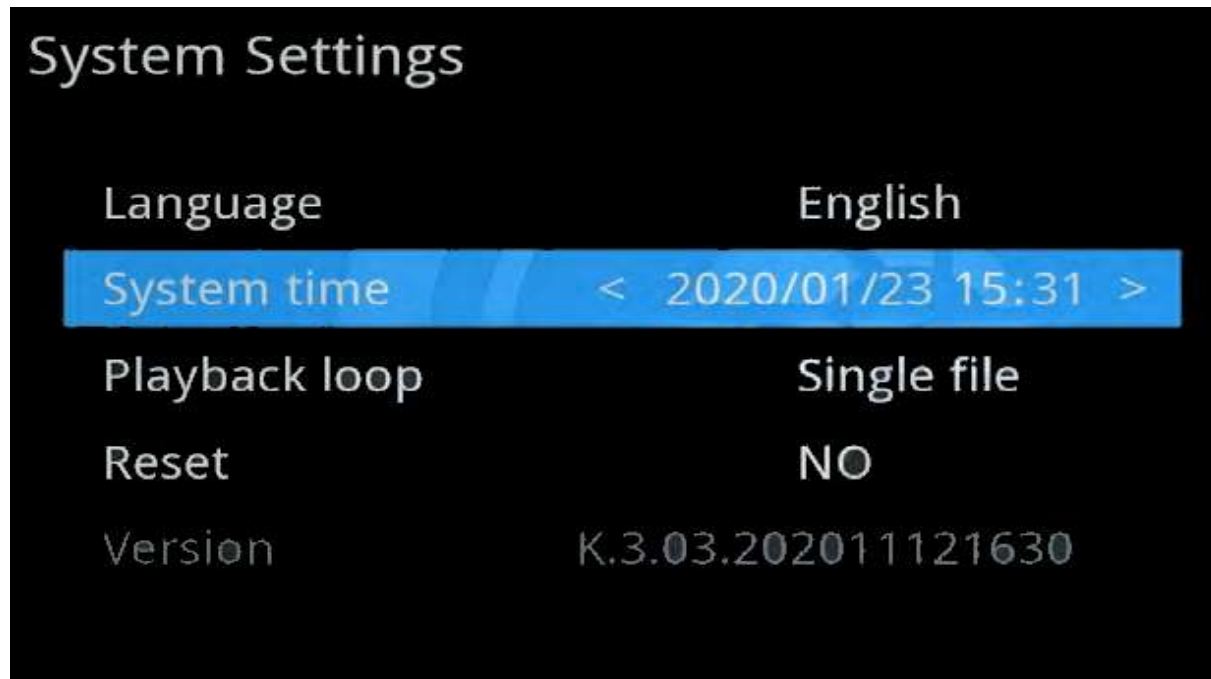

4.2. Playback the Recorded media files on TV

SCHEDULE RECORDING

5.1 Set the system time

Press the MENU button on the remote control. Select System settings in the OSD menu. Set the system time by using the four arrow buttons on the remote control. Then press BACK on the remote to finish the setting.

5.2 Set the schedule

Set the schedule mode, start time and finish time by using the four arrow buttons on the remote control. Then press BACK button on remote, it will save the scheduled tasks automatically.

Then LVR1000 will start to record videos automatically at the scheduled time.

Note: If you want to record certain TV channel's video, do select the TV channel first.

Install VLC player (Windows, Mac, and Linux Users)

VLC is a free and open source cross-platform multimedia player and framework that plays most multimedia files as well as DVDs, Audio CDs, VCDs, and various streaming protocols. Download and start streaming quickly and easily on Windows, Mac or Linux.

Please install VLC and run it on your computer.

Tip: You can click [here](#) to download VLC.

Install VLC player (Windows, Mac, and Linux Users)

Install OBS Studio

Please install Open Broadcaster Software (OBS Studio) and run it on your computer. If you are Mac/Linux users, please download OBS Mac/Linux version accordingly.

Tip: You can click [here](#) to download Open Broadcaster Software (OBS Studio).

Install OBS Studio

Does UHD Pro work with an over-2TB external hard drive?

Yes, UHD Pro works with an over-2TB external hard drive.

For LVR1000, it works with all formats of USB sticks(NTFS, FAT32, exFat) and external hard drives(MBR and GPT). FYI. Due to the maximum capacity limitation of FAT32 and NTFS format, if you use an over-2TB external hard drive and don't want to partition it, please format it to exFAT, it will work. If you want to use NTFS/FAT32, please partition it first, it will work.

File system limitations:

FAT: The single file can be 2GB at most. The maximum capacity of the partition is 2GB.

FAT32: The single file can be 4GB at most. The maximum capacity of the partition is 128GB.

NTFS: The single file can be 2TB at most. The maximum capacity of the partition is 2TB.

exFAT: Theoretically, there's no limitation on the single file's size and maximum capacity of the partition.

Why does the recorded file split into multiple segments?

Using exFAT/NTFS USB storage devices, the single recorded file will be 16.7GB at most. Using FAT32 USB storage devices, the single recorded file will be 4GB at most due to the limitation of FAT32 format.

Note: The single file length is also limited to 3 hours. If the size of the video file has not reached 4GB/16GB but the length exceeds three hours, it will also generate a new video file.

PRODUCT SPECIFICATIONS

Input	1920x1080 640x480, 720x480, 720x576, 800x600, 1024x768, 1280x720, 1280x1024, 600x1200, 1920x1080, 3840x2160(60HZ, 30HZ, 24HZ)
Output	640x480, 720x480, 720x576, 800x600, 1024x768, 1280x720, 1280x1024, 600x1200, 1920x1080, 3840x2160(30HZ, 25HZ)
Recording	Up to 3840x2160(30fps)
Output format	H.264, H.265
Video standard (input)	HDMI 2.0 standard
Input signal	HDMI, Line in, Mic
Output signals	HDMI (pass-through), USB, Line out
Max transmission bitrate	480 megabytes
Bitrate	Max: 20Mbps
Weight	8.5 oz
Dimensions	4.6 x 4.6 x 1.1 inches
