

## ***My message to Prince William (5 May 2024)***

Will, My Brain and Body **cannot** bear hot weather because the hypothalamus gland of Mine works abnormal. The gland **cannot** normally release heat out of My Brain and Body. Will, Daddy Almighty told Me “It is because I want everyone to know ***“The Homeland of Angie and Her Parents is not Thailand, but the UK!”***”

Will, now, the weather of Thailand is so very much hot until My Mom and I usually feel dizzy and vomit, and almost faint. We especially I need to turn on air-conditioners almost all days, but electricity cost is so very much expensive, and we have not much income. Will, ***many people all over the world passed away because of so very much hot weather!***

***So, Will, could You please quickly follow My advices? ... Will, You are The Future King and will be The Leader of Our Family. So that, Will, You have to be brave to make a decision!***

.....
