Make Labs Easy
with Digitalization & AI

Exceptional Research Begins with
Effective Laboratory Management

SciOne Guardian

## Fully Control Your Labs with Monitoring & Analytics

SciOne Guardian integrates plug-and-play wireless sensors, easy-to-use software, and AI data analytics solutions, continuously collect and transmit data from your lab to the cloud, and onto your personalized dashboards.

Key Features

All-in-One

- Robust IoT sensors for comprehensive monitoring of lab envinronment, LN2 tank, freezer, incubator, oven, etc.
- Our cloud-based software platform grows with your business, ensure long-term reliability and scalability
- APIs allow data to be integrated into other systems to ensure full access to use your data
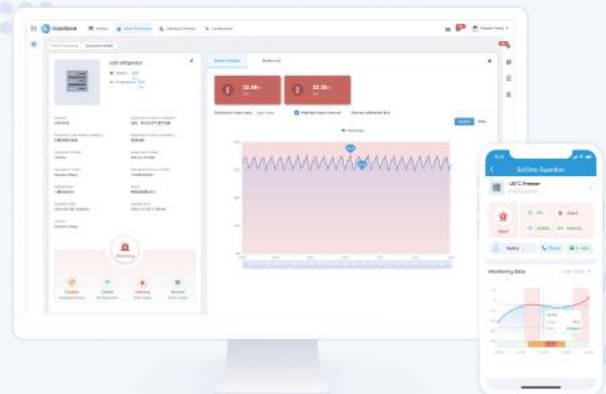

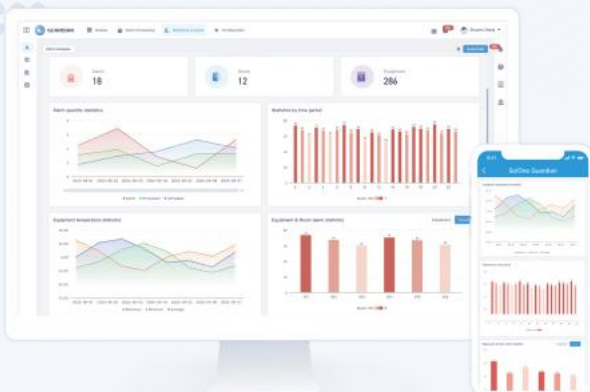

Ease-of-Use

- Wireless connections, plug-and-play sensors, easy for installation and service
- Preconfigured for quick deployment to ensure start monitoring minutes after setup
- With mobile APP, stay informed at anywhere, anytime

Smart & Customizable Alerts

- Immediate action on underlying issues with highly customizable contextual alerts
- Sensor-fusion technology for precise alert, minimize false alerts
- Comprehensive alert history with notes for context, a must-have for audits

Data Analytics & Dashboards

- Establish of historical records without additional effort
- Analyze historical data to identify trends and optimization insights
- Ensure compliance with regulations through accurate and detailed reporting

2

SciOne Equipment

## Maximize Lab Equipment Value with End-to-End Lifecycle Management

SciOne Equipment manages the entire lifecycle of your lab equipment, ensuring peak condition, minimizing downtime, and optimizing utilization.
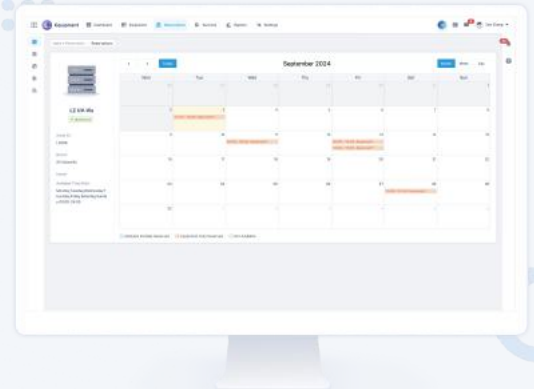

Key Features

Asset Ledger & Tracking

- Manage equipment lifecycle data from budgeting to disposal
- Provide built-in structures for accessories, service contracts, and documents
- Support definition of custom attributes

Maintenance & Calibration

- Submit, assign, and track repair tasks
- Define regular maintenance schedules and generate tasks automatically
- Support customized workflows and data definitions

Sharing & Scheduling

- Set rules and schedules for equipment sharing
- Schedule equipment usage with ease
- Support approval workflow definitions

Data Analytics & Utilization

- Gain insights with advanced visualization tools
- Generate dashboards for assets, maintenance, and scheduling
- Track equipment utilization and identify usage patterns

SciOne Inventory

Simplify Management & Compliance for Lab Chemicals & Consumables

SciOne Inventory simplifies tracking and reporting of inventory data, helps maintain a safe and compliant lab environment, and reduces waste by managing the entire lifecycle of lab chemicals, consumables, spares, and standards.
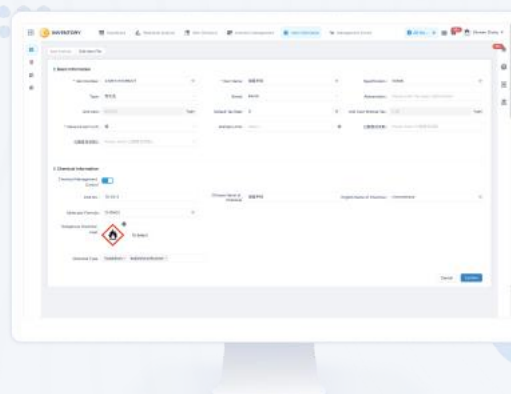

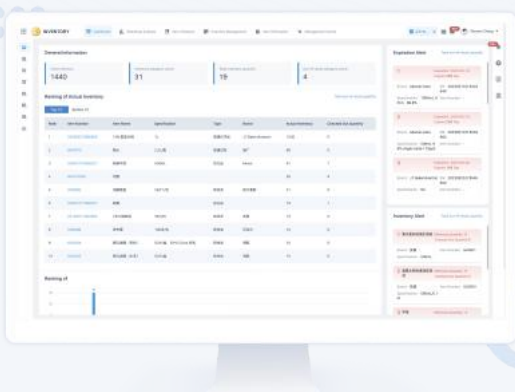

Key Features

Real-time Inventory Data

- Access real-time data on quantity and location
- Provide built-in lab-specific attributes and calculations
- Enable flexible definition of custom data attributes

Full Lifecycle Control

- Manage stages from request, procurement, storage, usage, and disposal
- Configure settings for check-out approvals
- Define customized workflows

Safety & Compliance

- Define hazardous materials
- Support searching and uploading of Safety Data Sheets (SDS)
- Maintain audit logs for check-outs and usage

Data Analytics & Alerts

- Gain insights with advanced visualization tools
- Monitor inventory status, turnover, and costs with dashboards
- Receive alerts for expirations, low levels, and late returns

SciOne Mentor

Unlock the Power of Generative AI with Lab Enterprise Knowledge

SciOne Mentor uses Generative AI for rapid searches and tailored responses with your lab's data, centralizing knowledge for quick access, enhanced productivity, and effortless compliance.

Key Features

Generative AI for Labs

- Deliver personalized search and data retrieval for labs
- Access information on operating procedures, equipment usage, SDS, and testing notes quickly
- Generate intelligent recommendations by leveraging industry and enterprise-specific knowledge
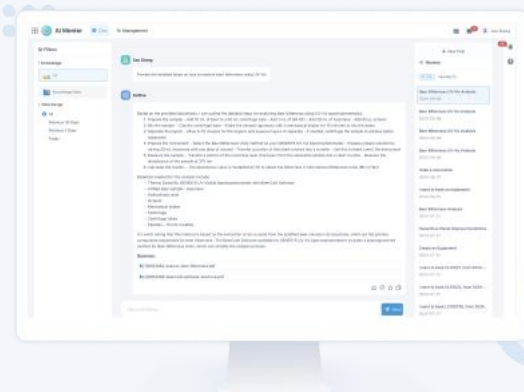

Generative AI on Your Lab Data

- Seamlessly upload or retrieve your data with built-in connectors
- Reference original data sources directly within search results
- Implement guardrails for secure, enterprise-grade generative AI protection

Centralized Knowledge Management

- Access all lab knowledge in one unified platform
- Organize data into customized knowledge bases for easier management
- Enable effortless sharing and collaboration across teams

Streamlined Action Interface

- Utilize an intuitive chat interface for streamlined actions
- Create, search, and view data instantly at your fingertips
- Engage with SciOne AI applications directly at the Point of Experience

> **Unlock the future of laboratory efficiency with SciOne AI – a comprehensive platform revolutionizing lab operations through advanced digitalization and artificial intelligence.**

SciOne Guardian
Fully control your labs with monitoring & analytics

SciOne Equipment
Maximize Lab Equipment Value with End-to-End Lifecycle Management

SciOne Inventory
Simplified Management & Compliance for Lab Chemicals & Consumables

SciOne Mentor
Unlock the power of Generative AI with Lab Enterprise Knowledge

Measurable Value

Cost Reduction
- **25%** Reduction on Capital & Service Spent
- **25%** Less Inventory Waste

Efficiency
- **50%** Faster Data Retrieval
- **30%** Reduction in Admin Time

Safety & Compliance
- **40%** Reduction in Safety Risks
- **30%** Fewer Compliance Violations
