ELECTRIFICATION OF TRAVELLING MACHINES

As a leading specialist in electrical power supply, FELS is broadening its MOBILIS range with a highly innovative line of single-conductor rails boasting an unrivalled aesthetic quality.

FROM INTEGRATION TO MAINTENANCE - A WHOLE LINE OF INNOVATIONS

MOBILIS MOVIT benefits from over 30 years' experience in electrical power rails and has in-depth knowledge of expectations on the world market - for all integrators, fitters and users. Designed in the same spirit as the multi-pole conductor rail MOBILIS ELITE, MOBILIS MOVIT focuses on three key features :

- simplicity, in terms of transport, assembly, maintenance and dismantling ;
- safety, by taking into account installation and service conditions as well as respecting standards and regulations ;
- reliability, for optimum customer satisfaction.

INSTALLATION AND ASSEMBLY - HIGHLIGHTS

As with the entire MOBILIS range, everything has been designed to facilitate the mounting process :

- suspensions pre-assembled in multiple pole units ;
- the profile easily slots into the suspensions by a simple clipping process ;
- many parts, such as covering flanges, feed boxes etc. are mounted without tools, screws or nuts ;
- all accessories are factory mounted.

MOBILIS MOVIT® : ELECTRIFICATION LINE WITH SINGLE POLE CONDUCTOR RAILS 315A - 450A - 630A

HIGHER PERFORMANCE

Designed in aluminium with a stainless steel track for the contact surfaces, it offers you high conductivity, light weight, competitive production costs and flexibility of shape.

With a clearance between rails of 50 mm, the aesthetic, compact design takes up minimum space and minimises voltage drops due to its low line impedance.

HIGHLY PRACTICAL

Numerous features make MOBILIS MOVIT easy to integrate, install and use:

- simply sliding and clipping into the suspensions
- compact connection requiring minimum preparation
- high-speed collector travel (up to 600 m/min.)
- long-distance lines without expansion joints
- suitable for inside or outside installation
- no tools required to mount insulation accessories
- rail profile providing easy installation of a de-icing system etc.

GREATER SAFETY

Security and working safety are the key-words for the entire range in total respect of the regulations and standards in force. The installed rail offers a protection index of IP 23, the PVC insulating envelope is fluted, thereby increasing insulation clearance, the collector brush has innovative reinforced insulation, the shape of the contact track enhances the quality and reliability of current collection, the quality of the materials and the care taken at every stage guarantee a long life.

DESIGN: ENHANCED EFFICIENCY

Just like the entire MOBILIS range, this rail has benefited from all the power of industrial design by combining performance, ergonomics, aesthetics and economic reality.

A VAST ARRAY OF APPLICATIONS

With this particularly powerful single-conductor rail, whole new fields of demanding applications can now benefit from the innovations and top performance of the MOBILIS range:

- *handling of heavy loads ;*
- *port industries ;*
- *high-capacity overhead cranes ;*
- *gantries ;*
- *human transport (peoplemover, monorails in amusement parks etc.).*
