

TIS 4 ANALOG INPUT MODULE

4 Zones 4-20mA

Data Sheet Rev 3.1

Model: TIS-4AI-420mA

OVERVIEW

This small module is used to connect different types of Analog 4-20mA sensors as it accept analog current inputs it contains programmable logic, and used in data acquisition systems, and building management systems (BMS) to monitor and control various processes.

The advantage of the current sensor is its high noise immunity. Current signals are less susceptible to electrical noise compared to voltage signals, making them ideal for long-distance transmission and noisy environments.

KEY BENEFITS

- + Connect any 3rd party 4-20mA analog sensors to TIS network
- + Monitor real-time information about the parameter being measured
- + Used for water tanks management, Pressure sensor, and BMS.
- + Take action depends on analog sensor reading in TIS network

KEY FEATURES

- ★ Free locate, small size module
- ★ Works with TIS-BUS protocol
- ★ 4x Analog 4-20mA inputs for monitoring and control
- ★ Integrated with Modbus RTU protocol using IP-COM-PORT gateway
