

Multiple Features Packed into One

Remote controls are arguably irreplaceable in our everyday lives, but they are also evolving as technology advances. There are now smart remote controls that include functions to expand the user's control over each and every detail of their house.

Our **Key Fob remote** is specially designed to facilitate the operation of your smart security system. It features a compact frame with multiple control options related to arming/disarming the alarms, access, and more.

It is crafted to provide the perfect feel in your hands or pocket.

You can carry it around your property and use its easily recognizable buttons to operate smart scenes and actions.

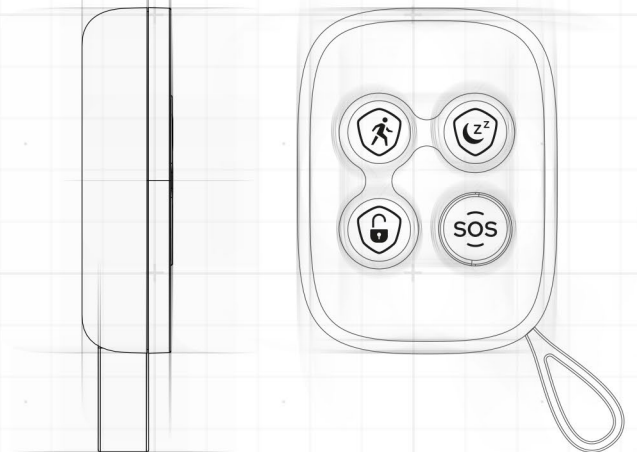

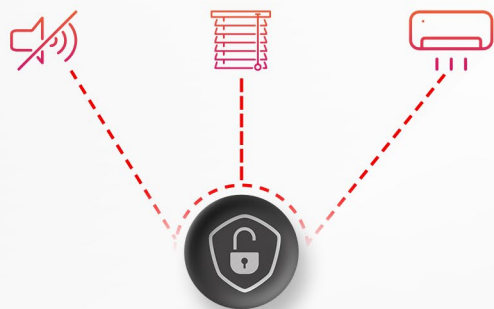

Integrating with the TIS smart automation system

you can deactivate the alarms

Working with this device is easy for everyone. In the morning, when you are leaving for work, easily activate your security system with a single click on your key fob. You no longer need to turn off the lights, lock the door, and arm the alarms individually.

The intuitive design of this remote control helps you take immediate action in times of emergency. There is no complicated navigation route, so even if the user is experiencing a panic attack, they will be able to maintain their security.

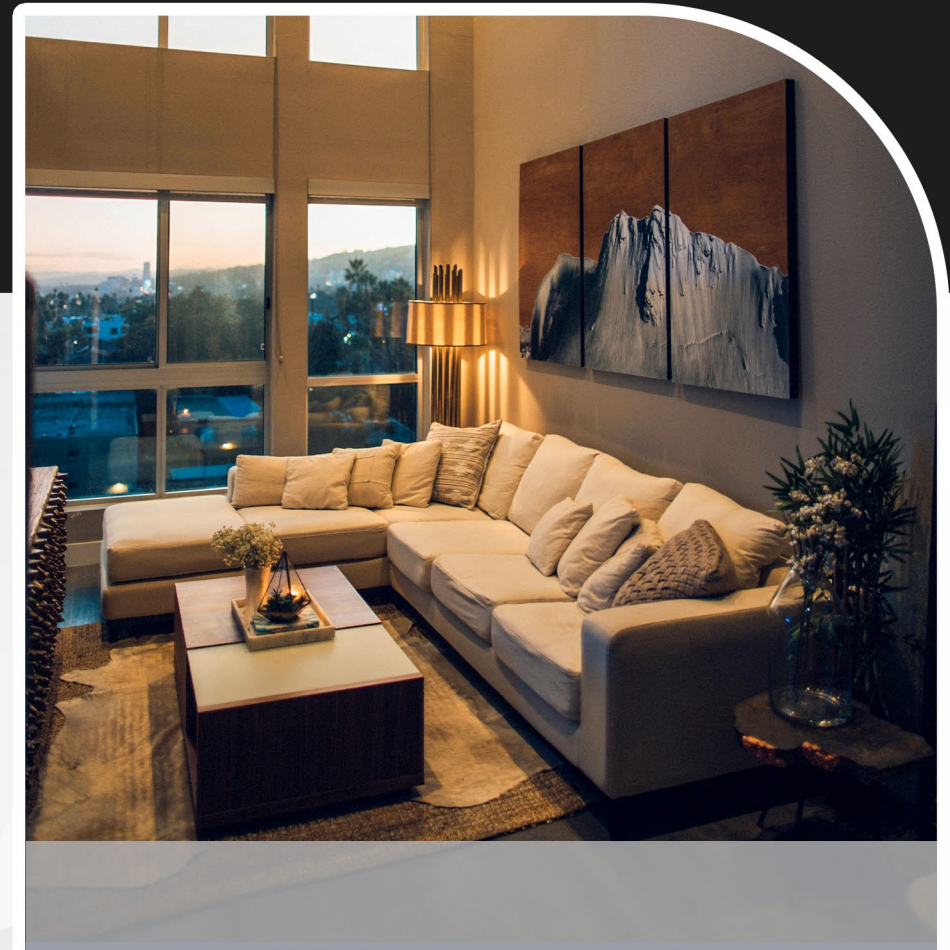

By integrating with TIS's smart automation system, you can deactivate alarms, close blinds, and turn on your AC system as you arrive home, immediately creating a relaxing atmosphere to chill for an hour.

Define the access and security options depending on your needs. It will become everything you need to perform your tasks. Want to open the gate or the back door? Want to turn off the sprinklers and lock the balcony simultaneously? Then this is definitely what you need!

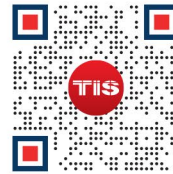

No extra equipment is required; simply add it to your hub, and start running the scenes you desire. This device is battery-powered and compatible with other intelligent solutions in your TIS platform.

Order today, and save yourself a lot of time and cash, as our key fob remote makes things much easier for you.
