Installation can be performed by stacking or hanging, using the optional accessories (single, double, triple beams) for customization to the studio environment.

Broadcast Quality Available

Accurate color reproduction, low latency of video processing, and HDR capability.

Powerful UI/UX with Megapixel VR HELIOS LED Processing Platform

Thanks to the compatibility between LBCG and the Megapixel VR HELIOS LED processing platform, you can now utilize the powerful UX and UI functionalities offered by HELIOS. HELIOS processing platform includes Real-Time Mapping and Multi-User Control, Superior Color Control, Hyper-Speed Seam Correction using a game controller, and Monitoring and Diagnostics through connected diagnostics.

* Please note that Megapixel VR HELIOS LED processing platform needs to be purchased separately, and depending on the actual usage environment, there may be limitations in the implementation of certain features offered by HELIOS. A game controller needs to be purchased separately.
