

LG MAGNIT

Brilliance for Your Haven

* All images in this brochure are for demonstration purposes only.

Accurate Colors, Full of Wonder

The display's solid blacks render truly accurate colors resulting in breathtakingly distinctive content. The carefully selected processor controls color purity to ensure a uniform color display across the screen. The more vivid the colors, the greater your wonder will be. Indulge in a festival of colors on a panoramic masterpiece.

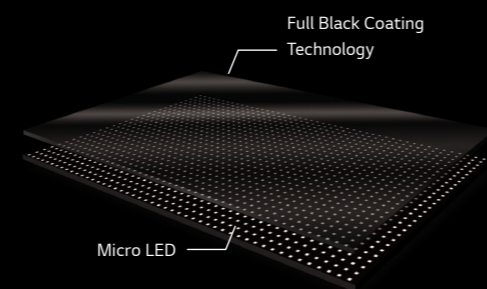

Infinite Darkness, Awakened Details

LG MAGNIT creates a surprisingly deep contrast. LG achieves this by removing the original RGB packaging and replacing it with its own full black coating technology. This enhances the color vividness and reveals even the tiniest details, that were previously hidden in the shadows, to provide a realistic sense of immersion.

Embrace Overwhelming Visuals Delivered by LG Micro LED Technology

LG's Micro LED display with 24 million self-emissive LEDs promises an entirely new and stunning visual impact, redefining the role of home screens.

* Product availability may differ by region. Please contact your local LG sales representative for more information.

Discover Your Optimum Picture Quality

Image quality is optimized through LG's a9 AI Processor, tailored to fit the ambiance of the content and brought to life with the Micro LED display.

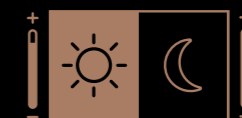

Auto Genre Selection

The processor analyzes the content type and automatically adjusts the picture to best suit the genre.

Face Enhancement & Text Upscaling

Upgraded deep-learning technology makes faces appear more vivid, and on-screen texts much sharper and clearer to read.

AI Brightness Control

After a sensor measures the surrounding light, the processor finely adjusts tone mapping for optimal screen brightness.

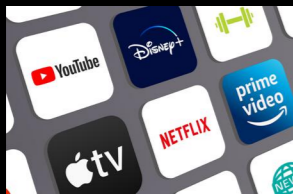

* Speakers sold separately

Bigger is Better

LG MAGNIT supports Miracast and AirPlay2, which means you can stream content direct from your devices to a larger, more immersive screen.

* Depending on respective app policies, wireless sharing may not be supported.

Broaden Your Content Horizons

Access all your favorite apps at the touch of a button. Thanks to its LG Smart TV webOS 6.0 platform and a 136-inch screen, LG MAGNIT takes your content to a whole new level.

* Internet connection and subscription to streaming services are required.

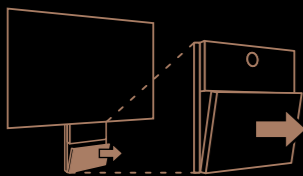

* Supported apps may differ by region.

* © 2022 Disney and related entities. Disney+ subscription required.

Certified Low-level Blue Light

In line with international certification, LG MAGNIT 136" is proven to emit lower levels of blue light, so you can feast your eyes on the big screen with less visual fatigue.

Seamless Media Furniture

As home screens continue to evolve and grow, users are left wondering how to integrate new technologies in their home space. With its own range of media furniture, LG MAGNIT 136" offers seamless and stylish integration, blending in beautifully with its surroundings.

* Media furniture sold separately

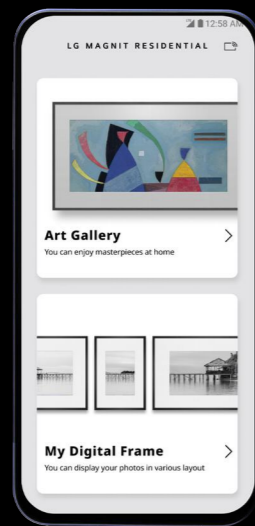

* Speakers sold separately

Built to Deliver the Ultimate Entertainment

LG MAGNIT is equipped with various user-friendly features to help you easily enjoy the innovative viewing experience delivered by ultra high definition in super-sized screens.

My Own Digital Gallery

Thanks to its very own mobile app, MAGNIT 136" becomes the canvas on which famous works of art can be displayed. Whether curating your own collection of masterpieces or casting a gallery of family photos – MAGNIT makes home living into a work of art.

* Image is for demonstration purposes only. Actual mobile app display may differ from the example shown here.
* Mobile app available in the second quarter of 2023.

An incredible Audio-visual Experience in Partnership with Bang & Olufsen

Exquisite picture quality and immersive powerful audio, working in harmony
to redefine the luxury home cinema experience.

Bang & Olufsen's rich heritage, spanning 97 years of design and audio excellence, makes an excellent match for LG MAGNIT. When adding the flagship Beolab 90 or Beolab 50 speakers to the screen, the result is an immersive cinematic experience with seamless, large-scale images and powerful, nuanced sound.
