

Dust Collector FILTER CLEANING SOLUTIONS

Discover what we've created for you.

The background image shows an industrial facility with large silos and complex piping. Two workers are visible: one in a blue shirt and white hard hat on a yellow staircase, and another in a dark blue uniform and orange hard hat standing on the ground. The scene is overlaid with large green and grey geometric shapes.

GOYEN Clean Air Systems ผู้นำระดับโลก ในระบบการกำจัดฝุ่น - เรา คือหุ้นส่วนทางวิศวกรรม ที่ผ่านการยอมรับ จากบรรดาบริษัทผู้สร้างระบบ Reverse Pulse Filter ขึ้นมา มากมายทั่วโลก ตั้งแต่ปี 1935, ลูกค้าของเราต่างได้รับประโยชน์จากประสบการณ์ และความเชี่ยวชาญเฉพาะด้าน, การออกแบบ นวัตกรรมใหม่ๆ, และเหนือสิ่งอื่นใด คือคุณภาพอันเป็นเลิศของตัวสินค้า อันประกอบไปด้วย วาล์วเป่ากระแทกฝุ่น, วาล์วพร้อมถังพัก, หัวยิงนอชเชิล, ชุดไหมเมอร์ ความคมล้าดับการยิงของวาล์ว และเครื่องมือตรวจวัดปริมาณฝุ่นละอองในอากาศ

ในระบบ Reverse Pulse Filter - ประสิทธิภาพในการยิงเป่า ทำความสะอาด และการทำงานร่วมกับถุงผ้ากรองในระยะยาว เป็นเรื่องที่ขึ้นกับการจัดสรรควบคุม ปริมาณ และ ความดันลม ที่จะกระจายเข้าไปในถุงผ้ากรอง 'แต่ละใบ' ตั้งแต่แรก จนถึงที่สุดท้ายที่ปลายท่อยิง, เป็นหัวใจสำคัญ, เพื่อประสิทธิภาพ และความสำเร็จ ของทุกๆระบบกำจัดฝุ่น - GOYEN พร้อมให้คำปรึกษา จากประสบการณ์อันยาวนาน ร่วมกับ GOCO Software Design Tool และสินค้าคุณภาพสูงที่ได้มาตรฐานทุกตัว

ในฐานะที่เป็นผู้ให้บริการโซลูชันอย่างครบวงจร - GOYEN ทั้งผลิตตัวอุปกรณ์ และคำนวณออกแบบระบบ ที่จะทำงานร่วมกันอย่างสมบรณ์แบบบนการบริหารจัดการต้นทุนอย่างมีประสิทธิภาพ, เรา ยึดมั่นในขั้นตอนการควบคุมคุณภาพอย่างเข้มงวด และมุ่งมั่นอย่างเต็มที่ ในการรักษาคุณภาพสิ่งแวดล้อมควบคู่กันไป

PULSE JET VALVES & DIAPHRAGM VALVES

READ MORE

Goyen manufactures diaphragm valves in a range of configurations to suit a variety of reverse pulse filter designs. These sophisticated valves precisely control airflow through the filters for optimal cleaning. Superior performance, easy maintenance diaphragm valve available with threaded ports (T) dresser nut ports (DD), flange and slide (FS) or manifold mounted (MM). Each series are available with integral pilot (CA) or as remotely piloted valve (RCA)

PILOT SOLENOID VALVES & ENCLOSURES

READ MORE

Pilot solenoid valves are used in a reverse pulse filter cleaning system to operate the diaphragm valves from a remote location. Pilot valves can be mounted separately or in multi valve enclosures. Multi valve enclosures provided a cost effective and organised method of housing banks of remote control pilot valves. Goyen offers a range accommodating up to 12 pilots in dust/rain proof and explosion proof configurations.

Power Supply	230VAC, 120VAC
Switch Type	2x DPDT, 10A
Switch Function	Hi, Lo, Hysteresis
Repeatability	±1% of F.S.
Setpoint Adj. by	Knobs on gage face
Temp. Limits	-6 to 48 °C
Weight	1.81 kg
Approvals	CE, CSA, UL

GOYEN

WHAT IS ECS CONTROL SYSTEM

An expandable reverse pulse jet valve control system that can run in continuous or demand mode and support up to 360 discrete outputs via 12 output expansion cards.

UNIQUE FEATURES OF ECS CONTROL SYSTEM

Expandable	• Can support 29 unique 12 output expansion cards.
Simple Interface	• Uses a portable membrane interface with an OLED screen
Cleaning Mode Selection	• Demand or Continuous
Manual Push Buttons	• Actuate each output via the push of a button
Multiple Voltage Free Inputs	• Fan Stop, Low Header Alarm, Demand/Continuous Selection
Multiple Voltage Free Outputs	• Coil is Firing, Coil Alarm, High dP
Wide Operating Temperature	• -40°C to 60°C (-40°F to 140°F)

ECS QUICK PULSE TECHNOLOGY

- This is a feature to give your baghouse additional protection in case your dust collector starts to get out of control.
- It gives you another differential pressure (dP) limit where you

can start pulsing with a shorter off time, quickening your pulse time, If the dP between the clean side and dirty side of your dust collector is still rising.

- This feature is disabled by default and just requires setting two parameters to implement:
 - + Quick dP Limit
 - + Quick OFF Time

ECS QUICK PULSE TECHNOLOGY

ECS CONTROL SYSTEM - DC OUTPUT MAIN BOARD

FILTER FAILURE DETECTOR (FFD)

WHAT IT DOES

- Continuous monitoring of fabric filter baghouses for broken bags
- Detects significant changes in particulate emissions
- Provides dual alarm relays (early warning and set maximum limit)
- Minimize false alarms thanks to digital averaging of readings and user selectable delay
- Has a 4-20mA output scaled to 0-200% of the limit alarm level to feed a PLC or other devices
- It's ATEX Zone 2 (Gas) and 22 (Dust) certified

PRODUCT DESCRIPTION

The main purpose of Goyen FFD is to detect significant increases in particulate concentration likely to be related with a broken bag in the filter or other major failures. Thanks to the 4-20 mA output it also acts as an integrated unit to deliver dependable and pragmatic filter monitoring.

The FFD utilizes a unique probe electrification technology which provides much better performances than conventional DC triboelectric systems as well as alternative AC systems. This allows extending the velocity range over which the system has no cross sensitivity to changing velocity. Thanks to that technology, the FFD is also unaffected by build-up of particulate on the sensing rod, thus eliminating signal drift concerns.

A charge signature is induced by particulates in the airstream interacting with the sensing rod. The FFD extracts a specific frequency band from the induced AC current signature and filter out the DC current generated by direct particle collisions. In order to reject signals falling outside a pre-defined frequency range, the so resulting signal is electronically filtered. Thanks to that, Goyen filter failure detectors are less susceptible to changes in particle velocity and are not affected by any particulate contamination on the sensing rod.

Also this technology, not relying on particles colliding with the probe, is able to measure a more representative area of the stack and eliminate the need of long sensor probe rods.

Thanks to the digital averaging of readings in combination with the alarm delay feature, by properly setting the delay period, the system will exclude short term signal increases associated with pulse cleaning of filters. This translates into a much lower likelihood of having false alarms.

OPERATIONAL RANGE

- Suitable for a wide range of dust collectors designs and configurations
- Dust level response: $<1\text{mg}/\text{m}^3$ to $500\text{mg}/\text{m}^3$ ($<0.028\text{ mg}/\text{ft}^3$ to $14\text{ mg}/\text{ft}^3$)
- Flue gas velocity from $4\text{m}/\text{sec}$
- Flue gas temperature up to 200°C (390°F)
- Ambient temperature from -20°C to $+50^\circ\text{C}$ (-4°F to $+120^\circ\text{F}$)
- Duct sizes from 0.5m
- Hazardous area ATEX II 3GD

FILTER FAILURE DETECTOR (FFD)

CERTIFICATION

CONFORMANCE AND RELATED STANDARDS

Goyen | Mecair hereby declares that this instrument—within the limits specified in this manual—complies with the essential requirements and other provisions of the pursuant European Union Directives : Low Voltage Directive, EMC Directive , and ATEX Directive.

For details refer to the Declaration of Conformance for this instrument or system (available on request from Goyen | Mecair or our local representative).

ATEX Standards

In addition , the instrument has been designed to be compliant with the below standards.

EN 60079-0:2012 + A11:2013	
Explosive atmospheres. Part 0 : Equipment – General requirements	Specifies the general requirements for the construction, testing and marking of electrical equipment used in explosive atmospheres.
EN 60079-15:2010	
Explosive atmospheres. Part 15 : Equipment protection by type of protection “n”	Specifies requirements for the construction , testing and marking for Group II electrical equipment with type of protection , “n” intended for use in explosive gas atmospheres. This standard should be read in conjunction with EN 60079-0.
EN 60079-31:2009 AND EN 60079-31:2014	
Explosive atmospheres – Part 31 : Equipment dust ignition protection by enclosure “t”	Specifies requirements for design , construction and testing of electrical equipment and Ex components.

FILTER FAILURE ALARM (FFA)

WHAT IT DOES

- Continuous monitoring of fabric filter baghouses for broken bags
- Clear indication of system status through full color display
- Provides dual alarm relays (early warning and set maximum limit)
- Easy and user friendly system setting via external keypad
- Has a 4-20mA output to feed a PLC or other devices
- It's ATEX Zone 2 (Gas) and 22 (Dust) certified
- Acts as a preventive maintenance tool

PRODUCT DESCRIPTION

The Goyen FFA provides you dependable and pragmatic filter monitoring through an easy setup external unit and clear, simple and language independent full-color LCD display. It features two alarm relays and a 4-20 mA output and can work in ATEX rated environments (II 3GD) and flu gas temperatures from -20°C to +240°C (-4°F to +464°F).

The FFA utilizes a unique probe electrification technology which provides much better performances than conventional DC triboelectric systems as well as alternative AC systems. This allows extending the velocity range over which the system has no cross sensitivity to changing velocity. Thanks to that technology, the FFA is also unaffected by build-up of particulate on the sensing rod, thus eliminating signal drift concerns.

A charge signature is induced by particulates in the airstream interacting with the sensing rod. The FFA extracts a specific frequency band from the induced AC current signature and filter out the DC current generated by direct particle collisions. In order to reject signals falling outside a pre-defined frequency range, the so resulting signal is electronically filtered. Thanks to that, Goyen filter failure alarms are less susceptible to changes in particle velocity and are not affected by any particulate contamination on the sensing rod.

Also this technology, not relying on particles colliding with the probe, is able to measure a more representative area of the stack and eliminate the need of long sensor probe rods.

Thanks to the digital averaging of readings in combination with the alarm delay feature, by properly setting the delay period, the system will exclude short term signal increases associated with pulse cleaning of filters. This translates into a much lower likelihood of having false alarms.

OPERATIONAL RANGE

- Suitable for a wide range of dust collectors designs and configurations
- Dust level response: <1mg/m³ to 500mg/ m³ (<0.028 mg/ft³ to 14 mg/ft³)
- Flue gas velocity from 4m/sec
- Flue gas temperature up to 240°C (464°F)
- Ambient temperature from -20°C to +50°C (-4°F to +122°F)
- Duct sizes from 0.5m
- Hazardous area ATEX II 3GD
- US-EPA MACT compliant

ATEX Standards

EN 60079-0:2012 + A11:2013

Explosive atmospheres. Part 0 : Equipment
– General requirements

Specifies the general requirements for the construction, testing and marking of electrical equipment used in explosive atmospheres.

EN 60079-15:2010

Explosive atmospheres. Part 15 :
Equipment protection by type of
protection “n”

Specifies requirements for the construction , testing and marking for Group II electrical equipment with type of protection , “n” intended for use in explosive gas atmospheres. This standard supplements and modifies the general requirements of EN 60079-0.

EN 60079-31:2009 AND EN 60079-31:2014

Explosive atmospheres – Part 31 :
Equipment dust ignition protection by
enclosure “t”

Specifies requirements for design , construction and testing of electrical equipment and Ex components. This standard supplements and modifies the general requirements of EN 60079-0.

BULK SOLIDS HANDLING

TYPICAL FLOW AID SYSTEM INSTALLATION

MODEL SELECTION GUIDE

The model and the quantity having the optimum impact force are selected according to the type, the shape, the size, and clinging and blocking condition in silo, hopper etc. For instance, when installing on the conical hopper of 1,200mm dia. 3.2mm thick, find the point of intersection X according to the figure below. As the point X is within the range of GK40 2 pcs, and GK60 2 pcs, select GK40 2 pcs, for small clinging strength, and GK60 2 pcs, for large clinging strength.

INSTALLING POSITION

VIBRATORS, AIR CANNONS, AIR KNOCKERS

EQUIPMENT FOR POWDER AND BULK SOLIDS HANDLING

Type VP

Linear Piston Vibrators

ไวยเบรเตอร์แบบลูกสูบ สร้างการสั่นเชิงเส้น โดยความถี่ และความแรงสามารถปรับได้ อย่างอิสระต่อกัน

- ความถี่ จะเปลี่ยนตามความดันลม
- ความแรง จะเปลี่ยนตามน้ำหนักของตั้มลูกสูบที่เขย่า

PREMAFLEX APPLICATIONS

PINCH VALVES | TYPICAL APPLICATIONS AND INSTALLATIONS

1. Liquid Level ON-OFF CONTROL

ใช้ Pinch Valve ในการ เปิด-ปิด รักษาระดับน้ำในแท่งค์ Vacuum Breaker (หรือ Standpipe) ทำหน้าที่ป้องกันไม่ให้ภายในท่อและ Sleeve เกิดสภาวะสุญญากาศ จากการ suction ของน้ำที่ไหลออก ซึ่งจะมากหรือน้อยก็ขึ้นกับ ความยาว และขนาดของท่อทางออก ที่อยู่ใต้น้ำ

2. Silo AIR LOCK

ติดตั้ง Pinch Valves 2 ตัว ซ้อนกัน เพื่อล็อกไม่ให้อากาศไหลเข้าออก จากแท่งค์ที่มีความดัน หรือแท่งค์ที่เป็น Vacuum. จากนั้น ปิด V.1, เปิด V.2 เพื่อปล่อยวัสดุ

3. STANDBY PUMPING

ขณะ Pump1 standby, V.1 ปิด, Pump2 run V.2 เปิด. เมื่อต้องการสลับ, ให้เริ่ม run Pump1 โดยยังปิด V.1 ก่อน, เพื่อไล่อากาศ ออกจาก by-pass A, เมื่ออากาศออกหมด ค่อยเปิด V.1 และปิด V.2 วิธีการนี้จะช่วยให้ไม่เกิด water-hammer กับ V.1

4. AIR FAILURE CLOSED - Independent

หาก safety position ต้องการให้ Pinch Valve "ปิด" เมื่อเกิดปัญหา Air Fail, สามารถทำได้โดยใช้วงจรด้านล่างนี้.

(2) 3/2-way sol.v. มีหน้าที่สั่ง เปิด-ปิด Pinch Valve โดยมี (3) 3/2-way air pilot valve ขวางอยู่, ส่วน (4) เป็นถังสำรองลม โดยมี (5) เป็น check valve.

ในสภาวะปกติ, (3) จะได้รับสัญญาณ air pilot จาก (1) และเชื่อมต่อ a-b ตลอดเวลา, (2) จะสามารถควบคุม เปิด-ปิด Pinch Valve ได้โดยตรง.

ในสภาวะ Air Fail, สัญญาณ air pilot จาก (1) หายไป, (3) จะกลับตำแหน่ง มาเชื่อมต่อ c-b แทน, ลมจากถังสำรอง (4) ก็จะไหลเข้าไป "ปิด" Pinch Valve

5. AIR FAILURE CLOSED - Simultaneous

6. DRIBBLE CONTROL

งานซึ่งตวงปริมาณ อาจต้องการให้ Pinch Valve เปิดสุด-หริ-และปิด.

เริ่มต้น (1) ปิด, (3) เปิด, (2) 3/2-way sol.v. สั่ง Pinch Valve ให้เปิดสุด

เมื่อตวงได้ 90%, (1) เปิด, (3) ปิด, Pinch Valve จะหริ่ง ตามความดันที่ตึงไว้

และเมื่อตวงได้ 99%, (1) ปิด, (3) เปิด, (2) ระบายลมทิ้ง เพื่อปิด Pinch Valve

7. AUTOMATIC FILLING STATION

ต่อยอดจาก Dribble Control ให้เป็นการวางอัตโนมัติ บนระบบสายพาน.

เมื่อภาชนะถูกลำเลียงเข้ามาถึงตำแหน่ง Switch (2) จะสั่งเริ่มการตวง

เมื่อตวงได้ 90%, Switch (3) จะสั่งให้หริ Pinch Valve เพื่อความแม่นยำใน

การตวง, และเมื่อตวงได้ปริมาณครบ Switch (4) จะสั่งจบ Batch, ปิดวาล์ว

Valbia

PNEUMATIC ACTUATOR

DOUBLE ACTING ACTUATOR

READ MORE

With reference to the above diagram it can be noted that the torque of a double acting actuator remains constant through-out the complete action. The user can decide on which model to choose according to his/her own specific requirements, using the following guidelines:

1. Define the maximum torque of the valve to automate.
2. To obtain a safety factor increase the torque value chosen by 25-50% (subject to the type of valve and working conditions).
3. Once the torque value suggested is obtained consult the torque chart and in relation to the corresponding air pressure find a torque value exact to or exceeding the one obtained.
4. Once the torque value is determined move horizontally to the column "model" to find the actuator model required.

AIR VOLUME DAMPERS

Single Blade, Round Regulation Dampers

- แดมเปอร์ ควบคุมปริมาณลมผ่าน จากท่อกลม, แบบใบเดียว, Balance Type
- แบบมือโยก Manual, แบบใช้ลมขับ Pneumatic, แบบใช้หัวขับไฟฟ้า Motorized Actuator
- ควบคุมแบบ เปิด-ปิด Shut-off, และแบบ แรง-หรือ Regulate, โดยใช้ Positioner Function
- เริ่มจาก DN80 ขึ้นไป, ออกแบบได้ตามต้องการ Custom Design

Multiple Blade, Square Regulation Dampers

- แดมเปอร์ ควบคุมปริมาณลมผ่าน จากท่อสี่เหลี่ยม, แบบหลายใบ, แต่ละใบกว้าง 100 mm
- แบบมือโยก Manual, แบบใช้ลมขับ Pneumatic, แบบใช้หัวขับไฟฟ้า Motorized Actuator
- ควบคุมแบบ เปิด-ปิด Shut-off, และแบบ แรง-หรือ Regulate, โดยใช้ Positioner Function
- เริ่มจาก 200x200 mm ขึ้นไป, ออกแบบได้ตามต้องการ Custom Design

READ MORE

General Information

ISO 1, 2 and 3 valve series as well as ISO 1 and 2 compact series are manufactured according to ISO standard 5599/1, and incorporate the famous Numatics lapped spool and sleeve for ultimate service life.

Due to the great variety of configuration and drive possibilities, they adapt to each task.

Characteristics:

- Modular reality, thus flexible and wear-free.
- **Strong and light** due to **aluminium alloy housing**
- Equipped with the famous **Numatics lapped spool and sleeve assembly**:
 - Insensitive, self-cleaning spool made of stainless steel with "air bearing effect" by air entrained between spool and sleeve (1 µm clearance), typical service life of **more than 200 million cycles**.
 - Can operate with **different pressures at the same time** within one valve, independent of flow direction.
 - Available as **5-port., 2-pos. and 3-pos. valves**.
- **Exchange of valves without dismantling** valve manifold.
- **M12 connector**, also DESINA standard, available
- **Worldwide support** by Numatics subsidiaries and dealers in **almost all countries in the world**.

Common Technical Data:

- Direct solenoid, solenoid pilot or air pilot actuated
- -20 °C to +80 °C ambient temperature range (not for C12... & C23...valves with M12 connector to VDMA 24571)
- Max. 50 °C medium temperature
- 1 to 16 bar pilot pressure
- Vacuum to 21 bar operating pressure
- Suitable media see Operating Instructions Compressed Air, page 844
- AC or DC
- Protection: IP 65 with plug-in and screwed connector
- 100 % solenoid rating
- Several types of manual overrides
- Materials:
 - Body Aluminium
 - Other parts Stainless steel, steel, aluminium alloy or plastic
- Static Seals NBR (Poppet valves H-NBR)
- Finish Anodized or varnished

Note: **High temperature valves**

Sizes ISO 1, ISO 2 and ISO 3 available for high temperatures

Maximum temperature:

Valve with connector socket 230-592 (grey) : **+125°C**

Valve with connector socket 230-593 (black) : **+125°C**

Air pilot actuated valve : **+150°C**

Option J08 in 11th to 13th digit of order code

Order example: **I23BA4004000061**

This refers to a ISO 2 series single solenoid pilot actuated 5-ported, 2-pos. valve with spring return.

The manual override acting directly on the spool is standard.

Voltage of the solenoid is 24 VDC.

The valve is supplied without base.

How to Order

Valves

YA1 BA 4 52 4 N 000 20

Valve Series & Port Size

YA1 = 1/8
YA2 = 1/4

Valve Type

BA = Single Solenoid Pilot, Spring Return W/Flush Locking Override
BB = Double Solenoid Pilot W/Flush Locking Override
PA = Single Air Pilot w/Spring Return
PP = Double Air Pilot

Function

4 = 2 Position, 4-Way
5 = 3 Position, 4-Way Open Center
6 = 3 Position, 4-Way Closed Center
7 = 3 Position 4-Way (5/3), Open to 4 (A) and 2 (B) in Center

Mounting

52 = Line Mounted (Manifold Mount With Adaptor)

Voltage

20 = 24 / 50-60 VAC
30 = 110 / 50-60 VAC
40 = 230 / 50-60 VAC
60 = 12 VDC
61 = 24 VDC
66 = 110 VDC
00 = N/A (Used With Air Pilot)

Options

000 = Standard (Class F Coil)
*83C = 22mm Class H Coil
12A = Viton Seals on Sleeve Assembly
14A = External Pilot Supply
18D = Side Ports (Namur Plate Needed When 18D Option Is Used For Namur Interface)

Port Type

N = NPTF
G = G tap

Wiring Option

4 = DIN Plug-In DC Solenoid
2 = DIN Plug-In AC Solenoid or Air Pilot

NOTE: Plug connector is included with DIN solenoid

*: Consult ASCO SongJiang factory

Plug Connector Assemblies

PLUG CONNECTOR DESCRIPTION	PART NO.
Black Plug Assembly	88122404
Plug Assembly with 24V Led	88122405
Plug Assembly with 115V Led	88122407
Plug Assembly with 230V Led	88122410

PARTICULATE FILTER/REGULATOR

- High flow with a wide range of adjustable output pressure ranges
- Optional low profile gauge, round gauge, digital gauge or digital pressure switch
- Optional extended temperature range of -40 °F to 176 °F (-40 °C to 80 °C)
- Sintered polyethylene elements, with centrifugal separator, include 5, 25 and 40 Microns
- Threaded ports allow for individual or modular mounting
- Innovative two position plastic drain with manual and semi-automatic functions. Additional drains include an automatic style (brass) and manual (stainless steel)
- Polycarbonate and Aluminum bowls with a selection of sight gauge materials that meet industry and application requirements
- Key lockable and tamper resistant models
- Air purity class according to ISO 8573-1: 2010

REGULATOR

- High flow with a wide range of adjustable output pressure ranges
- Available with relieving, non-relieving and internal flow check options
- Optional low profile gauge, round gauge, digital gauge or digital pressure switch
- Optional extended temperature range of -40 °F to 176 °F (-40 °C to 80 °C)
- Threaded ports allow for individual or modular mounting
- Key lockable and tamper resistant options

LUBRICATOR

- Provides consistent reliable lubrication to the system
- Uses venturi type technology to distribute the lubrication into the compressed air line
- Optional electronic liquid level indicator provides condition monitoring
- Allows fill while under pressure from fill port or bowl by removing the fill plug
- Polycarbonate and Aluminum bowls with a selection of sight gauge materials that meet industry and application requirements
- Recommended oil type: Non-detergent type and without aggressive additives (VG32 - ISO3448)
- Threaded ports allow for individual or modular mounting

SHUT OFF ISOLATION VALVE

- Robust and easy-to-operate shut off valve, with lockout (front or back) on handle
- Provides shut off to downstream machinery
- Optional low profile gauge provides clear indication of the downstream pressure, and when the downstream components can be safely removed when pressure (P2) is at zero
- Available as 3/2 or 2/2 construction
- Threaded ports allow for individual or modular mounting

XO SERIES

FR.L COMBINATION

READ MORE

The XOU consisted of XOFR and XOL, each unit can be ordered separately.

The XOF with water separator cleans the compressed air of fluid oil, condensation and dirt. Particles. For special application, the standard 40µm filter element may easily be replaced by a 5µm filter element.

The XOR maintain inputting constant operating pressure despite fluctuation in line pressure and the amount of air consumed. The proportional lubricator adds a regulated quantity of oil to the filtered air. The oil-mist content proportional to the flow and oil can be added during operation. The oil drip rate is controlled by the adjustable bolt. Normally, 1to 12 drops/1000L of the air is Sufficient

XO SERIES

LUBRICATOR

READ MORE

The direct constant-density lubricator add regulated quantity oil to the compressed air. A valve maintains oil mist content proportional to the compressed oil flow.

The pressure drop that occurs when the air flow through a sight feed oil cup delivers oil from the bowl to the sight oil indicator. The drop of the oil flows into the air channel when it is atomized.

The oil drip rate is controlled by means of the regulating screw. Normally, 1 to 12 drops/1000L of the air is sufficient.

VACUUM SYSTEMS

Stand alone type Ejector

VH VS VU VUM VB VM VC | VY

อย่างง่าย แบบตัวเดียวๆ
สร้างแรง Vacuum จากลมอัด

Combination type Ejector

VG VK

มาพร้อม Filter, Suction Sol.,
Blow-off Sol., Vacuum Switch

Comb Ejector+Vac.Pump System

VJ, VJP VX, VXP

สามารถใช้ร่วมกับ Vac.Pump
ในกรณีที่ suction เป็นเวลานาน

Ejc.+V.Pump on Sub-D Manifolds

VQ, VQP VZ, VZP

ขนาดกระทัดรัด พร้อม Sub-D
Connector สำหรับต่อสายไฟ

Vac.Gen. for Particle Transport

สำหรับลำเลียง แป้ง ผง ผุ่น
ตั้งแต่ขนาดเล็กๆ จนถึง 7 mm

Standard Type

VP_R VP_A

ผิวราบเรียบ ผิวโค้งเรียบ
แผ่นหนา ผลไม้ ลูกบอล

Sponge Type

VP_S

ผิวขรุขระ ผ่นด้านนอก
หิน กรวด เปลือกหอย

Bellow Type

VP_B

บรรจุภัณฑ์อาหาร
ฉนวน ห่อฟิล์มพลาสติก

Oval Type

VP_E

เซอร์กิตบอร์ด แผงวงจร
จับขอบสองข้างของชิ้นงาน

Soft Type

VP_L

แผ่นพลาสติกชนิด
ชิ้นส่วนของเลนส์ เปราะบาง

Skid-proof

VP_KNH

ชิ้นงานเปื้อนคราบน้ำมัน
แผ่นโลหะปั๊มขึ้นรูป สีน

Thin Type

VP_P

แผ่นกระดาษ แผ่นฟิล์ม
ช่องพลาสติก

Long Stroke

VP_xx

ชิ้นงานพื้นผิวต่างระดับ

Free Holder

FH

Free Holder ทำให้ Pad
สามารถแกว่ง ให้ตัวได้ 30°

We are engineering partner as a total system solution provider, The manufactures a range of components to ensure cost effective and reliable cleaning system design, The products are produced to exacting tolerances and quality standards to ensure their effectiveness within any reverse pulse filter. As a comprehensive solution provider, We have great quality control procedures. The calculate various system designs and can work together perfectly. Finally we are fully committed to maintaining environment quality together.
