¹ Document print speeds are the averages of ESAT (Word, Excel, PDF) in Office Category Test for the default simplex mode, ISO/IEC 24734. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc.

² TWAIN driver (ScanGear) is based on the TWAIN specification V1.9 and requires the Data Source Manager comes with the operating system.

³ Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard. Optical resolution scan is available, only when you use TWAIN Driver.

⁴ Copy speeds are the average of sFCOT and sESAT, ISO/IEC 29183. Copy speeds (ADF) are ESAT of copy in sequence, ISO/IEC 24735. Copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc. and does not take into account warm up time.

⁵ Operation can only be guaranteed on a PC with a pre-installed Windows 7 or later.

⁶ When copying ISO/JIS-SCID N2 (printed by inkjet printer) on A4 size plain paper using default settings.

⁷ Page Yield is the estimated value based on Canon individual test method using the ISO/IEC 24712 colour chart and continuous printing simulation with the replacement after initial setup. Page yield varies significantly depending on contents printed and other factors.

⁸ Based on 1 set of colour bottles.

⁹ The Economy mode reduces the ink consumption by lowering the density. More pages can be printed than the Standard mode.
