

## The smarter choice for versatility.

Learn, explore, and work smarter with the slim and lightweight IdeaPad Duet 3i, a detachable that lets you work and play with a 11.5" color-accurate display and the detachable keyboard, while you take notes with the Lenovo Digital Pen. Powered by up to Intel® processors, the Lenovo AI Engine unlocks smarter experiences that adapt across multiple scenarios.

### Why you should buy the Lenovo IdeaPad Duet 3i

#### Designed for any scenario

Designed for ultimate versatility and freedom, the lightweight IdeaPad Duet 3i is detachable and enables multiple scenarios such as work as a laptop, entertainment as a tablet; and a note-taking pad with the Lenovo Digital Pen. Up to 10% slimmer than the last generation, the chassis comes in Abyss Blue, with a two-tone color design on the front cover.

#### Hi-Fi entertainment anywhere

Carry high-quality entertainment with you anywhere on the 11.5" display featuring narrow bezels for an 85% AAR, 97.5% DCI-P3 for vibrant and super-saturated colors, and 400 nits brightness for viewing outdoors. Vibe and flow to smooth and high-fidelity audio from Dolby Audio®-certified speakers.

#### Level up your on-the-go productivity

Level up your productivity game on the go with up to the latest Intel® processors and up to Intel® WiFi 6 connectivity for faster speeds and lower latency. Access faster data transfer and power delivery with two USB 3.2 Gen 1\* Type-C™ ports and stay productive outside for longer with a 20% larger battery compared with the last generation.

#### Enhance e-learning and conferencing

Engage in improved smart e-learning, conferencing, studying, and streaming with high-quality visuals from the 5MP front and 8MP rear cameras. Drop notes with the Lenovo Digital Pen into Smart Note, which beautifies your handwriting in real time and supports audio recording and notes.

\* The actual transfer speed of the USB 3.2 will vary and, depending on many factors, such as the processing capability of host and peripheral devices, file attributes and other factors related to system configuration and your operating environments, will be slower than a speed of 20 Gbit/s.
