Ribbon Properties

Description	Specification	Measurement Method
• Polyester Film Thickness	4.5 Microns	Micrometer
• Ink Coating Weight	$1.10 \pm 0.30 \text{ g/m}^2$	-
• Heat Resistance Coating Weight	$0.15 \pm 0.55 \text{ g/m}^2$	-
• Ink Softening Point	-	Manufacturer's published values
• Print Sensitivity	7	-
• Print Energy (PET Labels)	25 mj/mm^2	-
• Abrasion Resistance	11	-
• Heat Resistance	$<170^\circ\text{C} (<338^\circ\text{F})$	-
• Print Density	>1.5	Optical Densitometer

Recommended Applications

Pharmaceutical Labeling, Rating Plates, All Outdoor Application, Drum Labeling, Etc.,

Storage & Shelf Life

Recommended storage conditions :

- Store away from heat and direct sunlight
- Store in clean and dry places
- Avoid storage in high humidity areas
- Avoid storage in very dry environments

Recommended shelf life : 1 year

Recommended temperature and relative humidity (RH) :

- Temperature : $5^\circ\text{C} - 35^\circ\text{C}$
- RH : $25 \bar{n} 80\% \text{ RH}$

Other remarks :

- Please avoid contact with water moisture and chemicals
- Once opened, please keep remaining/ balance material in plastic bags and ensure proper sealing

Specifications are subject to change without prior notice.

Specialty Ribbons

SATO also offers a variety of ribbons designed for customers with specific requirements.

Benefits

- Available in wax, wax / resin, or resin for diverse applications
- Multiple colors
- Near-edge capability

Halogen-Free Ribbons

SATO's ribbons are halogen-free as we are committed to contribute towards a greener environment and partner with our customers to implement green initiatives.

Why Choose Halogen-Free Ribbons?

- Better for the environment
- Enhanced fire safety with lower smoke toxicity
- Comply with applicable environmental and "green" initiatives
