

## WALL MOUNTED MINI SWIM CURRENT MACHINE

### Introduction:

Many private and small swimming pools are small due to the limited activity space and swimming distance. In order to provide homeowners a private swimming pool with swimming functions, the manufacturer has developed the MPU08 wall mounted Mini swim current machine. By providing strong propulsion power, swimmers can swim in counter flow to exercise, which makes private swimming pools more valuable.

### Product features:

- Easy installation: wall mounted, ready to use.
- Small size: it is compact, saving space, easy to transport.
- Stepless speed regulation: 1-99 speeds, suitable for beginners or professional swimmers.
- Easy to operate: Equipped with a remote control, easy to use.
- Made by an integrated molding process and durable, corrosion-resistant & UV resistant material.
- Low voltage: with low-voltage DC29V motor, more safe and reliable.
- Equipped with regular motor rotation function to extend service life.
- Suitable for various swimming pools such as above ground and under ground pools with minimum pool size of 2m by 4m.

Model	Power supply (V)	Working voltage (V)	Rated power (kW)	Rated current (A)	Max. Speed (m/s)	Max. flow (m³/h)	Min. Pool depth (m)	Dimension (mm)
